

3/17/21

To whom it may concern,

From May of 2020 to March of 2021, I had the pleasure of working with Antony Pizarro at McCann Systems, where he was a Field Applications Engineer in our Operations team.

- Antony is a technically gifted person who uses his strong knowledge of AV technologies to test and commission audiovisual systems.
- He has a logical approach to troubleshooting which he repeatedly used to resolve complex issues in AV systems.
- Control system programming was not part of his role at McCann, but he knew when to use those skills as part of the commissioning process.
- Antony committed himself to learning new technologies during his time with McCann with a strong focus on audio processing.

On a personal level I can attest that Antony is easy to work with and is a true team player. He was popular at McCann and would be a fine addition to any team. His departure from McCann Systems was a result of internal restructuring and in no way is it a reflection on his work.

If you require any further feedback on Tony's skills or experience, please do not hesitate to contact me on 908.227.9241 or at mevans@mccannsystems.com.

Kind regards,

Mark Evans
Operations Manager
McCann Systems
