

ANTONY PIZARRO

Phone: (201) 956-9835 Email: apizarro23@live.com <https://apizarro23.github.io/> [LinkedIn](#) [Github](#)

SKILLS React, Redux, JavaScript, HTML, CSS, SQL, Sequelize, SQLAlchemy, Python, Flask

PROJECTS

chirpchirp | (React/Redux, Python, Flask, SQLAlchemy, CSS)

[live](#) | [github](#)

- Twitter clone, social media platform

- Full CRUD functionality for chirps (tweets) and comments as a signed up user with authentication
- The ability to like chirps is available as well as viewing a user's profile
- Created solely by me

cloneBnB | (React/Redux, Sequelize, CSS)

[live](#) | [github](#)

- Airbnb clone, accommodations website

- Full CRUD functionality for spots (places to stay) and reviews as a signed up user with authentication
- The ability to make a booking and view all of your bookings is also available
- Created solely by me

notDiscord | (React/Redux, Python, Flask, SQLAlchemy, CSS, Websockets)

[live](#) | [github](#)

- Discord clone, direct messaging platform

- Full CRUD functionality for servers, server channels, and server information as a signed up user with authentication
- Project has the ability to send direct messages to other users and have direct messages in a server channel
- Successfully communicated proper functionality of websockets to the group to implement throughout the project
- This was a collaborative project with three other students

EXPERIENCE

Field Applications Engineer

McCann Systems - Edison, New Jersey

April 2020 - April 2021

- Deployed code in live client environments and worked with clients and integrators to ensure that systems met individual contracts and delivery plans
- Communicated delivery issues that arose with project management and clients and planned executables to assure completion of project by deadlines
- Completed final commissioning of live client environments which included: provisioning video conferencing systems, ensuring all physical endpoints were working as desired, etc.
- Diagnosed, communicated, serviced, and remedied any and all AV and VC issues that arose

Audio Visual Software Developer

PepperDash - New York, New York

April 2018 - April 2020

- Created delivery plans based on client needs for enterprise-level systems
- Managed and created codebase standards
- Deployed code in live client environments and worked with clients and integrators to ensure that systems met individual contracts and delivery plans
- Diagnosed, communicated, serviced, and remedied any and all AV and VC issues that arose

Audio Visual Control Systems Programmer

Spectra Audio Design Group - New York, New York

November 2016 - April 2018

- Programmed system controllers and created GUIs for specified needs and environments (Crestron)
- Onsite deployment and quality control of Crestron Code and GUIs
- Main onsite contact for service; worked with clients to assess and remedy issues in a timely manner

EDUCATION

App Academy - Online Educational Platform

May 2022 - October 2022

- 1,000+ hour immersive full-stack software engineering program with a less than 3% acceptance rate and a rigorous curriculum (Javascript, Python, HTML, CSS)
