

ANTONY PIZARRO

Phone: (201) 956-9835 Email: apizarro23@live.com <https://apizarro23.github.io/> [LinkedIn](#) [Github](#)

SKILLS JavaScript, React, Redux, HTML, CSS, SQL, REST APIs, Sequelize, SQLAlchemy, Python, Flask, Git, PostgreSQL, Express, NodeJS, Websocket

PROJECTS

chirpchirp | - *Twitter clone, social media platform (React/Redux, Python, Flask, SQLAlchemy, CSS)* [live](#) | [github](#)

- Full CRUD functionality for chirps (tweets), comments, and likes as a signed up user with authentication
- Tested user profile viewing capability with 20+ accounts

cloneBnB | - *AirBnB clone, accommodations website (React/Redux, Sequelize, CSS)* [live](#) | [github](#)

- 100% CRUD functionality for 10+ spots (places to stay) and reviews as an authenticated user with account profile
- Booking a spot and viewing bookings is a highlight on web application

notDiscord | - *Disord clone, messaging platform (React/Redux, Python, Flask, SQLAlchemy, CSS, Websockets)* [live](#) | [github](#)

- CRUD functionality for servers, server channels, and server information as user with authentication on sign up page
- Project sends direct messages to other users and contains direct messages in a server channel
- Taught 3 members of the project the proper functionality of websockets which was implemented on 100% of web app's messaging services

EXPERIENCE

Field Applications Engineer

McCann Systems - Edison, New Jersey

April 2020 - April 2021

- Deployed code in 200 live client environments and worked with 30-40 clients and integrators to ensure that project-specific functionalities and displays integrated to client scope
- Established communication with project managers and clients regarding delivery issues
- Planned 100% of executables to assure completion of projects by deadlines
- Completed final commissioning of client projects which included: provisioning video conferencing systems, ensuring that 100% of physical endpoints were working as desired, etc.
- Diagnosed, communicated, serviced, and remedied all AV and VC issues at 2x the speed of other developers

Audio Visual Software Developer

PepperDash - New York, New York

April 2018 - April 2020

- Generated 3-4 monthly delivery plans based on user needs for enterprise-level systems
- Managed and produced codebase standards for over 100 clients and 500 systems
- Launched code in client spaces and consulted with clients and integrators ensuring that systems met contract plans
- Wrote system code with 95% success rate during initial testing

Audio Visual Control Systems Programmer

Spectra Audio Design Group - New York, New York

November 2016 - April 2018

- Programmed system controllers and yielded GUIs for specified needs and environments (Crestron)
- Deployed onsite quality control of Crestron Code and GUIs
- Serviced 185 clients to assess and remedy issues in a timely manner while being project's primary point of contact

EDUCATION

App Academy - Online Educational Platform

May 2022 - October 2022

- 1,000+ hour immersive full-stack software engineering program with a less than 3% acceptance rate and a rigorous curriculum (Javascript, Python, HTML, CSS)
